## Project Design Phase-II Technology Stack (Architecture & Stack)

| Team ID       | PNT2022TMID50469                             |  |
|---------------|--|--|
| Project Name  | Estimate the Crop Yield using Data Analytics |  |
| Maximum Marks | 4 Marks                                      |  |

## Technical Architecture:

**Table-1: Components & Technologies:** 

| S.No | Component                       | Description   | Technology  |  |
|------|---------------------------------|---|---|--|
| 1.   | User Interface                  | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | IBM Cognes  |  |
| 2.   | Application Logic-1             | Logic for a process in the application                                    | Java  |  |
| 3.   | Application Logic-2             | Logic for a process in the application                                    | Cognos Assistant  |  |
| 4.   | Database                        | Data Type, Configurations etc.  | MySQL, NoSQL, etc.  |  |
| 5.   | Cloud Database                  | Database Service on Cloud   | COGNOSCS.   |  |
| 6.   | File Storage                    | File storage requirements   | IBM Block Storage or Other Storage<br>Service or Local Filesystem |  |
| 7.   | External API-1                  | Purpose of External API used in the application                           | IBM Cognos Analytics REST API                                     |  |
| 8.   | External API-2                  | Purpose of External API used in the application                           | -   |  |
| 9.   | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud :                          | IBM Cloud – IBM Cognos Analytics                                  |  |

## **Table-2: Application Characteristics:**

| S.No | Characteristics          | Description   | Technology                                |  |
|------|--------------------------|---|---|--|
|      |                          |   |   |  |
| 1.   | Open-Source Frameworks   | List the open-source frameworks used  | IBM Cognos Framework Manager              |  |
| 2.   | Security Implementations | List all the security / access controls implemented, use of firewalls etc.  | Security architecture present             |  |
| 3.   | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Micro-services)  | Business Intelligent architecture         |  |
| 4.   | Availability             | Justify the availability of application (e.g. use of load balancers, distributed servers etc.)                            | Present on cloud and is present on demand |  |
| 5.   | Performance              | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | Highly available and fast processing      |  |
